SUMMARY

Backend Software Engineer with 5+ years of experience designing and shipping distributed systems at scale across fintech and cybersecurity. Specializes in event-driven architectures, billing infrastructure, and cloud-native platforms on AWS and Azure. Delivered systems serving 30M+ users with measurable revenue and cost impact. Strong ownership of architecture decisions, database design, system reliability, and cross-team execution.

TECHNICAL SKILLS

Languages: Java, JavaScript, Go, C++, SQL

Backend & Architecture: Spring Boot, Microservices, REST APIs, Apache Kafka, Event-Driven Systems, gRPC, System Design

Cloud & Infrastructure: AWS (Lambda, SQS, SNS, S3, EC2, IAM), Azure, Terraform, Docker, Kubernetes, Jenkins, CI/CD

Databases & Search: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Practices: Distributed Systems, High Availability, Idempotency, Observability, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer II | BharatPe | Gurugram, India

Mar 2025 – Present

Leading Indian fintech platform, 10M+ merchant network

- **Notification & Billing System:** Architected paid SMS/WhatsApp notifications with automated pro-rated recurring billing and revamped the Go-based staff module with per-staff billing plus advanced edit/notification controls. Drove 3 Cr+ customer adoption, ₹54 Cr in cost savings, removal of 9.5L unbilled staff records, and ₹2.37 Cr in additional revenue.
- **Server-Driven UI:** Built a backend-driven UI personalization system for Home Page, All-Products, and Profile Page through merchant cohortization using a rule-engine-based architecture. Serves 25M+ DAU with <200ms latency.
- **Payment Gateway Integration:** Integrated and stabilized payment gateway flows in the Bharat Recharge module, improving transaction reliability and handling high-volume production traffic.
- **AI Video Generation:** Developed asynchronous backend workflows for AI-generated video creation in the Merchant App, enabling automated content generation at scale.
- **Mentorship:** Mentored junior engineers and new hires through code reviews, design discussions, and pairing sessions, accelerating their onboarding and raising overall code quality across the team.

Software Engineer II | Sophos | Gurugram, India

Dec 2021 – Mar 2025

Global cybersecurity leader, \$711M+ revenue, 500K+ customers

- **Azure CIS Benchmark v1.5 (End-to-End Ownership):** Led architecture and delivery of CIS Benchmark compliance checks across Azure compute, storage, networking, and IAM. Achieved CIS certification, deployed to 20,000+ enterprise customers globally.
- **Lazy Load Policies:** Implemented lazy-load policies that reduced database size by 50% and cut monthly DB costs by \$1,000.
- **Sophos XDR Reports:** Designed and shipped a feature in Sophos XDR enabling customers to download comprehensive reports for all detections, enhancing usability and customer experience.
- **SSPM:** Designed and developed a security-posture product for Office 365 from scratch. Owned database schema, Azure security integration, and AWS event pipelines (SQS, SNS) for async posture updates.
- **Serverless Storage Protection:** Built an advanced malware detection application leveraging the Sophos detection engine to strengthen security of customer S3 buckets, with third-party integrations (Jira, Teams) for incident workflows.
- **Threat Timeline Visualization:** Built a feature visualizing the sequence of events for critical detections on customer endpoints. Provisioned all required AWS resources from scratch using Terraform within a microservices architecture.

Software Engineer I | Safe Security | New Delhi, India

Feb 2021 – Sep 2021

Cyber risk quantification platform, backed by John Chambers and McKinsey

- Built RESTful APIs for a cloud-native third-party risk assessment service performing external security scoring of organizations using Node.js and AWS.

Software Intern | Compro Technologies | New Delhi, India

Jun 2019 – Dec 2019

- Developed and implemented modules replicating core functionalities of Microsoft Excel within the SIMS e-learning platform.

EDUCATION

B.Tech Computer Science — Banasthali Vidyapith

2016 – 2020

AWARDS & RECOGNITION

- **High Flyer Award, Sophos:** Outstanding engineering contributions across CIS Benchmark and SSPM.
- **A-Team Award, BharatPe:** Led delivery of the Notification & Billing System with direct P&L impact.
